(Maximum weight load 5lbs)

PLM-M2-CTM-16--Prolite Clamper light weight device mount. Height starts at 16" extends to 21"
(Maximum weight load 5lbs)

2. What type of light weight device will you be mounting?

Name of device: _____ Made by: _____

Do you have an existing device or will you be ordering a new device?

I will be ordering a new device.

(When ordering a new device be sure to tell the manufacture you **DO NOT** want their quick release back plate mounted to the back of your device.) CJT will provide you with a back plate and a quick release system. (**If you are ordering a PRC device the CJT back plate will need to be sent to PRC for them to install the plate at the time of your order)

I have an existing device (If you have an existing device, does your unit have a back plate already mounted to the back of your device?)

Yes No
